

DOOR CONTROL

File No. | 3.3.1.1

Cabinet Locking System

Retail Refrigeration Unit

REFRIGERATOR GLASS DOORS

Cabinet Locking System

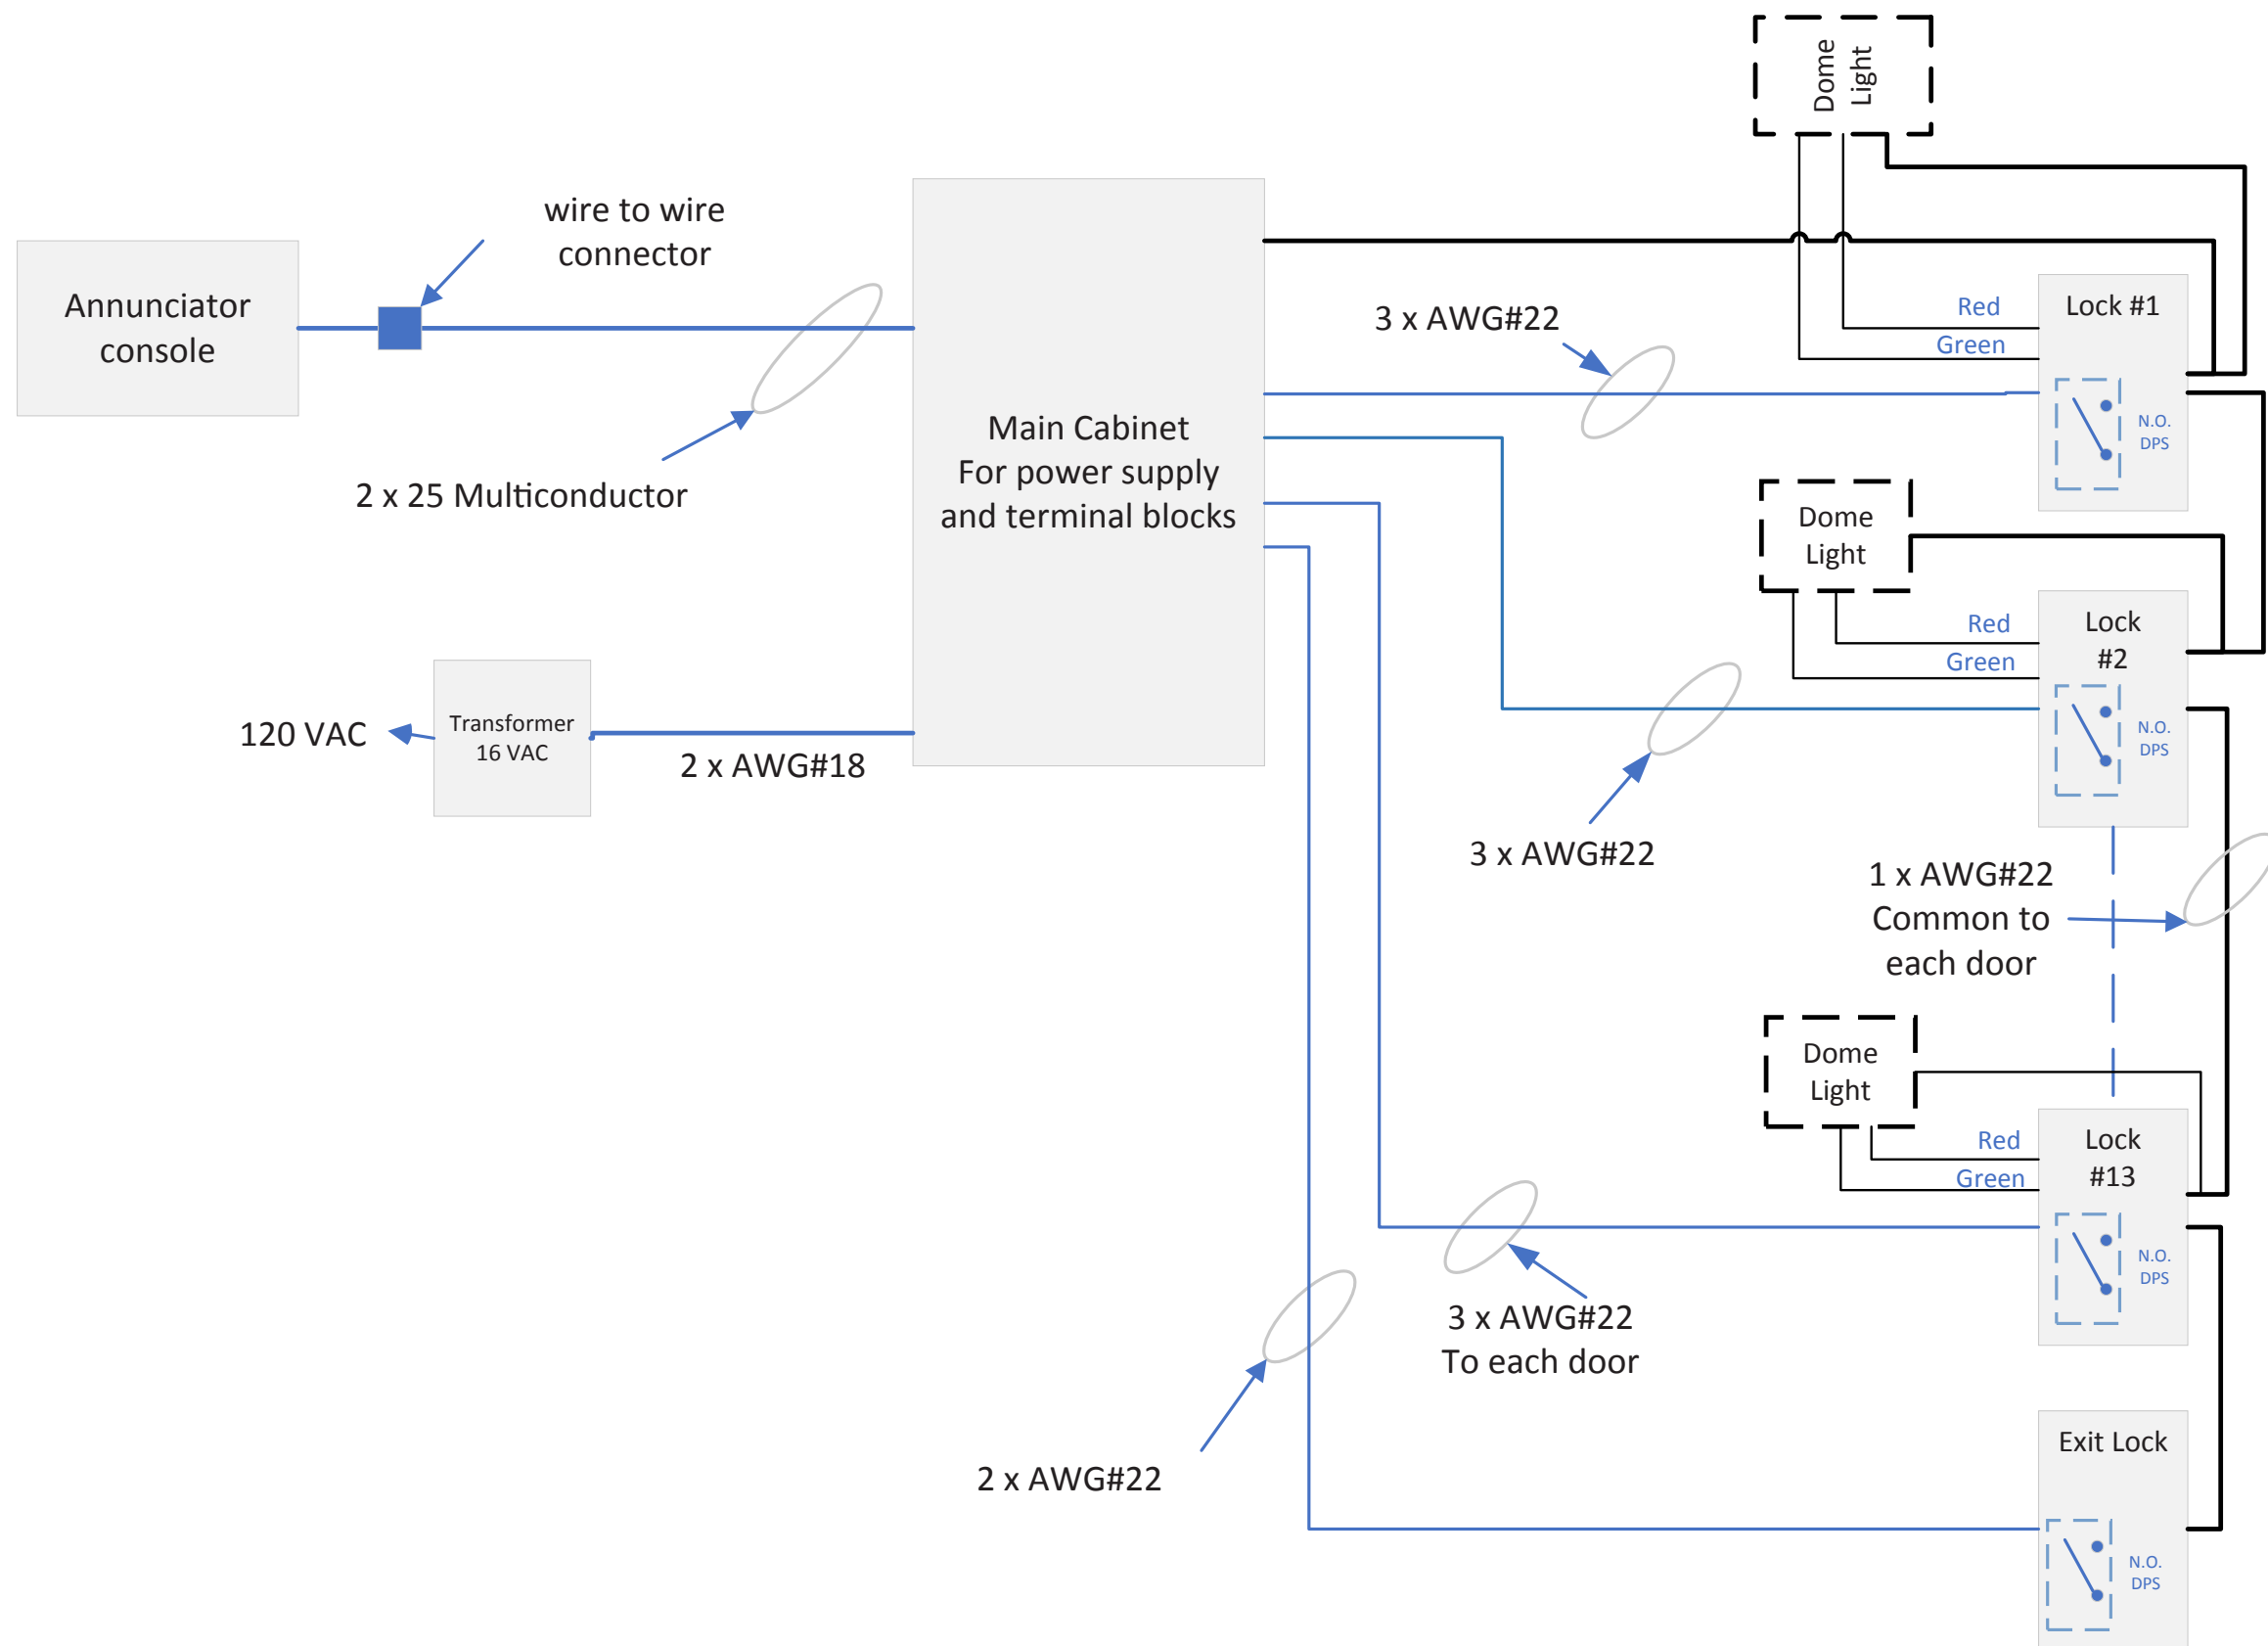

Designed for existing convenient store refrigerators that require their contents to be locked to prevent theft. The console mounted at the cashier station enables the operator to unlock and monitor which door is open or unlocked by simply pressing the illuminated push button.

FEATURES

- A complete solution to control and annunciate which door is open or unlocked
- Highly visible Red/Green LED lamp identifies which door is unlocked or open from afar
- A desktop console unlocks and annunciates which door is open or unlocked. No training required.
- Durable industrial quality products designed for high frequency and long-term use
