

Camden Introduces Column™ Push Plate Switches

Camden CM-75 series Column™ push plate switches are designed to provide a highly accessible and convenient means of door activation. They are easy to install (either wired or wireless), and can activate from any height or angle. Robust construction and dual 15 Amp. internal contact switches ensure years of trouble free service.

Column™ push plate switches are easily activated:

By Hand

By Arm/Body

By Foot

- Heavy-duty construction, ADA Compliant
- Low profile contoured design, with easy activation from side angles
- Meets or exceeds California building code, section 1117B.6
- Over 94 square inches total activation area (CM-7536)
- Choice of 4 different stock graphics

- (2) fully redundant SPDT, 15 Amp., UL listed, switches (CM-7536)
- Choice of anodized clear aluminum or dark bronze finishes
- Optional 'snap-in' Lazerpoint RF™ wireless transmitters
- Adjustable leveling screws for easy installation on uneven wall surfaces
