

## CS-CTN Series Door Monitoring/Control Stations

### DESCRIPTION

Camden's extensive line of LED annunciators includes the option for custom door monitoring and control stations. Camden flush mount stations include heavy gauge single, double and triple gang stainless steel faceplates that can be fully customized to meet the exact requirements of each application.

### Features

- Custom design with the low cost & quick delivery of stock product
- Heavy gauge stainless steel faceplates mount on standard in-wall electrical boxes
- Option for push buttons, including buttons with LED illumination
- Option for ½" or ¼" LEDs
- Option for cam key switches or toggle switches
- Option for sounder (common or individual door)
- Option for custom laser etched text or graphics on faceplate
- Full 3 year warranty

### Control Station Components

Camden monitor/control stations are configured from a range of available options. The finished product model number is based upon the specific options defined, in sequence. For example:

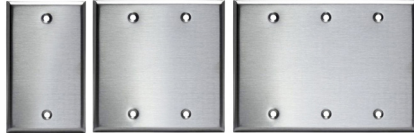

#### CS-CTN2-7G10-4-7012-SK20CL

This model number defines a control station that has a double gang faceplate, with (4) green 1" momentary push buttons, each button with ¼" Red 12V LEDs, a 95db sounder, a 2 position momentary key switch and custom graphics.

## Faceplate Size
